**In the specification:**

Please replace the title of the invention with the following title:

--System and Method for Priority Based Integrated Broadband Data Transmission--

Please replace the paragraph entitled "Abstract of the Disclosure" on page 20 of the specification with the following paragraph:

-- A Broadband data delivery system comprising queues for satellite data transmission, including a queue for such as data entities to provide a video stream, wherein entities must be sent at a minimum rate to avoid interruption of a video presentation. In one aspect, control routines of the invention divide non-video entities into portions small enough to be transmitted such as avoid interruption of the video stream transmission, and cause the divided portions to be interspersed with and simultaneously transmitted with the video data entities.--
